

Which method on the session object can be used to remove an object from the cache?

#	author_id	author_name	author_age	
1	1	max webber	55	
2	2	regina	34	
*	NULL	NULL	NULL	

@Autowired

EntityManager **entityManager**;

@Test

@Transactional

public void testCaching(){

org.hibernate.Session session

=entityManager.unwrap(Session.**class**);

Author author=**biRepository**.findById(1).get();// run the query
from database

biRepository.findById(1);// run the query from level 1 cache

session.evict(author); // remove the object from cache

biRepository.findById(1); // run the query from database

}
